

Information about data protection and declaration of consent

Dear participant,

Thank you for your interest in participating in the interview. This interview takes place within the course "**Avaliação da Qualidade de Uso de Sistemas**

", which is part of the Post Grad from "UX Experiência do usuário e Interação Humano Computador" at PUC-Rio. The Interview will be held online through Google Meet or Zoom. In order to use your personal data, we need your written declaration of consent. Please, carefully read the following information.

General study information

The goal of our study is to explore tools within the Human-Computer Interaction (HCI) environment, to approach the topic of the development of pleasant experiences in waiting areas of malls.

We would like to investigate this topic from different perspectives of consumers to further understand what can be a pleasant experience and what can be done without affecting the "flow" of shoppings malls.

Overall study procedure

The interview duration will be around 45 minutes and will be held online. We will take notes and record audio.

Rights

The participation in this research is voluntary. You may withdraw or stop your participation at any time without incurring any consequences. Moreover, you can request information about the processed personal data at any time, even after the termination of the research (for further information see also *Confidentiality and data processing*). If you have any questions, please contact one of the interviewers:

Isabel Melibeu: isabelmelibeu@gmail.com

Risks

You do not incur any risks by participating in this study. If you feel uncomfortable during the interview you can cancel at any time without giving reasons and without incurring any consequences.

Confidentiality and data processing

Your data will only be processed within the research project if you give your written consent. Your data

will be stored on password-protected computers. Moreover, personal details and data will be kept strictly confidential and will not be passed on to third parties. The data collected in the research can be stored for up to 10 years after completion of the project. Moreover, it can be used for reports or scientific publications, however, your name or other personal data cannot be identified by third parties. Images and/or sound recordings are only used in anonymized form.

The following personal data will be collected:

- Name
- E-Mail address
- Profession

Contact
